Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 48,50,52,62-65 and 67 are rejected under 35 U.S.C. 102(e) as being anticipated by Morris, et al.-2004/0249394.

Morris discloses a suture advancing means- 20,70, a straightening means 18, grasping means 3,4 attached to the straightening means. Wherein the advancing means directs the suture through soft tissue while the grasping means stabilizes the device relative to the tissue. The grasping means includes one movable and one stationary jaw. Both jaws have openings for receiving the needle therethrough. Fig. 53-56 show the opening on the movable jaw as being open to allow lateral release.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

The factual inquiries set forth in *Graham* v. *John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

- 1. Determining the scope and contents of the prior art.
- 2. Ascertaining the differences between the prior art and the claims at issue.
- 3. Resolving the level of ordinary skill in the pertinent art.
- 4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 53-61 and 66 are rejected under 35 U.S.C. 103(a) as being unpatentable over Morris, et al.-'394 in view of Klein-4491135 and Smith, et al.-5797961.

Morris discloses the invention as claimed with the exception of the needle having an opening receiving the suture. However, Klein discloses that it was known to provide suturing needles with either an eyelet or swaging attachment. It would have been obvious to attach the suture to the needle by eyelet or swaging- which also requires an opening (see Smith element 25 or 27.) as this provides a known alternative attachment location or means for the suture to the needle.

Response to Arguments

Applicant's arguments filed 08-16-2006 have been fully considered but they are not persuasive.

Applicant's only arguments as to the inappropriateness of the art rejections is that the Morris reference is not valid prior art because it does not pre-date the earliest effective filing date of the present claims due to the applicant claiming priority to provisional application 60/271392. However, none of the claims of the present application find support in this disclosure, as will be noted below. Therefore, applicant's priority date falls after the effective filing date of the Morris reference making the Morris reference valid prior art under 102(e).

The 60/271392 application does not provide support for the straightening means of claim 48; and the extension of the elongate member with the suture being passed through the elongate tube attached to the jaws such that the elongate member is passed through an opening in one of the jaws to a position outside of or past the grasping mechanism, present in the other independent claims.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the

Art Unit: 3731

shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Glenn K. Dawson whose telephone number is 571-272-4694. The examiner can normally be reached on M-Th 7:30-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Anhtuan T. Nguyen can be reached on 571-272-4963. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
